Description :

Prsentation de l'diteurCelebrate the world of Steampunk: a world filled with beauty and innovation. A world in which steam power and technology intertwine to create machines that are not only functional and practical, but also unique and striking. The Art of Steampunk brings the vision of Steampunk artists from around the world, alive on the page, providing a unique insight into the captivating and dynamic world of a vastly underground genre. The 17 artists featured have had their work displayed at an exhibition at The Museum of History of Science at the University of Oxford in England, and have attracted the media attention of BoingBoing, one of the world's largest blogs. Their artwork consists of everything from clocks and watches to light fixtures and jewelry, and every piece demonstrates hours of painstaking work and

devotion from its creator. In most cases, the artists themselves are just as unique and colorful as their masterpieces. Those fully embracing the Steampunk ideology have adopted a Victorian alter ego - mad scientists and world explorers - to match the complicated intricacies of their artwork. For more about steampunk, please visit <http://www.artofsteampunk.com>
